

## BEST NON-SURGICAL BODY SHAPER

HEALTHSPRINGS LASER & AESTHETIC CLINIC

### Vanquish

**B**anish love handles and obvious tummy bulges painlessly. Using scientifically proven and clinically tested revolutionary non-invasive Selective

RF (radio frequency) system, Vanquish helps reduce unwanted body fats by causing the fat cells at targeted areas to die naturally—and all this without touching the body. The Tissue Selectivity and Unique Thermalprofile technologies deliver thermal energy to the fats, while protecting skin and the surrounding tissue and organs. Most patients fall asleep during the treatment as the mild to moderate heat sensation from the device feels comfortable enough to “lull” them to sleep. Expect to see results within just weeks of the

first treatment and an improved midriff after your final treatment. Not a weight reduction treatment, Vanquish is well suited for those who wish to reduce unwanted fats.

All that's required is four to six sessions, once every week for a more shapely you with a visibly contoured midsection—no more stressing over having to achieve 100 sit-ups a day.

#### KEY BENEFITS

##### NO STRICT DIET OR EXERCISE REGIMEN REQUIRED

Great news for foodies, this treatment only requires you to maintain a healthier lifestyle, so there's no need to starve yourselves or go on a strict diet.

##### NON-SURGICAL & NON-CONTACT

Ultimately Vanquish helps achieve a visibly contoured mid-section in a non-invasive way, without any surgery or injections. The non-contact equipment is clinically tested for fat reduction without causing thermal burns.

##### RESULTS THAT LAST

As long as you maintain your current weight and lifestyle, you get to keep your improved silhouette for a long time.

Vanquish is from \$600 per 45-minute session. Available at: Healthsprings Laser and Aesthetic Clinic, #10-01A Liat Towers, 547 Orchard Road, Tel 6856 8386; #02-01/02 Greenridge Shopping Centre, 5244 Jelebu Road, Tel 6852 6681.
